

Timescape P400X Time Clocks

Proximity Card Data Terminal

Payescape provides a complete product line of IP based real-time “Push” terminals designed for Timescape Time & Attendance Solutions. The Timescape P400X Proximity Card Data Terminal offers flexible input for a variety of bar code symbologies, and an easy-to-use keypad interface. This cost sensitive device is built on a powerful processor platform in order to seamlessly integrate with Timescape software, and economically satisfy business needs.

IP-based real-time “push” clock

All employee information is instantly recognized in Timescape software.

Easy-to-use graphical user interface

The intuitive GUI was developed with smart phone ease-of-use in mind, and is combined with the brilliant color display providing a world-class user experience.

Seamless integration with Timescape software

The only clock designed by Payescape for Payescape. Tight integration means the terminal is always up-to-date with software revisions and employee data.

Zero configuration and easy to install

No user interaction is necessary for initial configuration. Simply connect power and data to the clock and start punching.

Reliable and affordable

Low entry price provides a platform for small companies to realize efficiencies and power of biometric terminals when coupled with Payescape’s industry leading time and attendance software. Timescape Pad Time Clocks and Touch Time Clocks are rugged and durable to withstand years of hard use from office settings to factory floors.

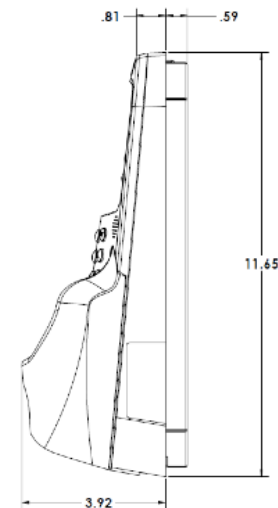

Multiple prox card technology supported

Common proximity card support included for best out-of-the-box experience.

Specifications

WEIGHT	3.5 lbs w/o mounting plate 5.5 lbs w/ mounting plate
DIMENSIONS	7.63"W X 11.65"H X 3.92"D
POWER	24W @ 12VDC Installation with universal power supply 100 – 240 VAC : 47 – 63 Hz
ENVIRONMENT	Operating: 32F to 113F (0C to 45C) 20% to 80% RH Storage: 14F to 140F (-10C to 60C) 5% to 85% RH
COMMUNICATIONS	Ethernet and USB
DISPLAY	4.3" diagonal color 480 X 272 pixel resolution
PLATFORM	166Mhz processor 512MB flash memory with optional expansion
ACCESS CONTROL	SPDT relay for door lock output
OPTIONAL BATTERY BACKUP	Two hour battery backup Utilizing 8 AAA NiMH batteries
CERTIFICATIONS	UL, FCC Class A

Proximity Card Authentication

Proximity cards are inexpensive, easy and quick for employees to use, reliable, and secure. The Timescape proximity card solution has incorporated the ability to read many different types of proximity badges with a single model. This allows customers to utilize existing infrastructure or select the best solution for their environment. Supported card technologies include:

- 125kHz: HID, AWID, Lenel and GE/CASI
- 13.56MHz: MIFARE DESFire, Secure MIFARE, and iClass
