

PayEscape and OLS Limited Partnership
Working together to provide high
quality professional security
services to businesses.

Think Security Think OLS

- Access Control
- Gates and Barriers
- Turnstiles
- CCTV / ANPR
- Service and Maintenance
- Turnkey Project Service
- Integrated systems

Why Access Control?

Business

- Integrated solution to reduce manual effort
- Integrated solution to ensure accurate control and restriction
- Seamless access control and restriction
- Keep premises and staff safe
- Convenience of 1 badge
- GDPR Compliant
- Audit trail and reporting of events

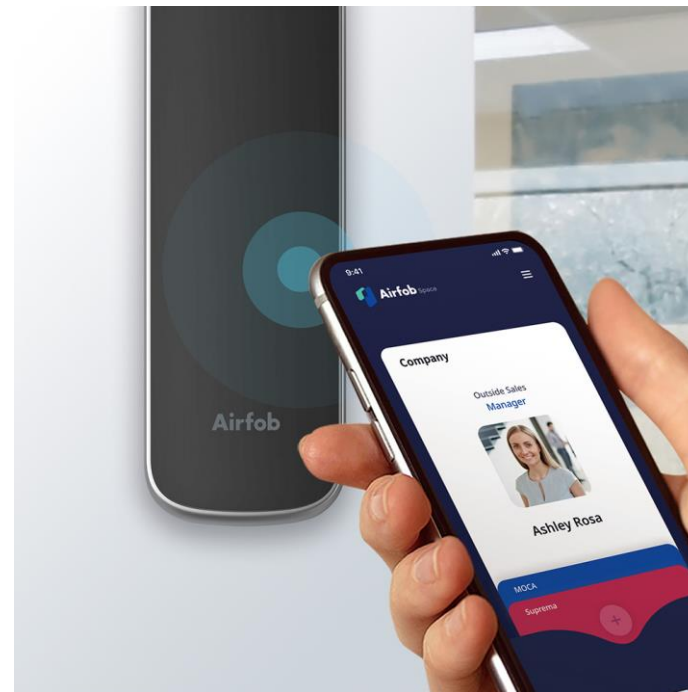

Personal

- Protect personal belongings and company property
- Improve engagement by making employees feel safe
- Muster reports at the touch of a button
- Ensure accountability
- Enable emergency lockdown

Solution

A secure comprehensive cloud-based access control solution, on a dynamic platform, to enhance site security, system management and administration.

Our Solution

- Fully integrated solution
- Seamless interface
- No interface for customer to manage
- One badge for all systems
- Validate / add / remove employees autonomously
- Assign access levels for pre-defined employees
- Integration offers minimal administration of all systems
- Fire alarm Mustering reports (App Based)
- T&A Applications

Scalable Solution

- **Full Cloud**

- A secure comprehensive full cloud access control solution
- Dynamic platform, to enhance site security
- Easy system management and administration
- Full integration to 3rd party systems using API's

- **Scalable Solution**

- Easily manage users' permissions
- Mobile credentials (any smart Phone)
- Multi site
- Manage all your sites and users from a unified friendly interface
- Cost effective
- Custom templates

- **Technical Requirements**

- No Local Server/PC Required to run software.
- Automatic Back Ups: No risk of losing valuable information when you need it.
- On Demand Access & Security from AWS
- Automatic updates, so you can rest assured you are always using the most up-to-date version.

When you hear.... Think OLS

Hear....

- We need to improve our security...
- Multiple badges.. What for.. Why?
- We want to manage data more easily across different systems
- Our system is outdated...
- We have too many manual processes...
- We haven't even considered access control

Ask....

- What security measures do you have in place?
- Is your security system currently integrated?
- Is your system future proofed?
- Have you considered the benefits of single source data population and the man hours it can save?
